

**Features:**

Hermetically sealed enclosure  
Low power consumption  
Ultra-High frequency stability  
AT- and SC-Cut crystals  
Best frequ.-stab. vs. temp. and ageing  
Stability as low as  $\pm 0.5$  ppb over -20 to +70°C

**Typical Applications:**

Test Equipment  
Pico-Base Stations  
Telecommunication Systems  
GPS

Base models can be modified to your specification  
within the performance ranges shown below.

**General Performance of QO2736D series**

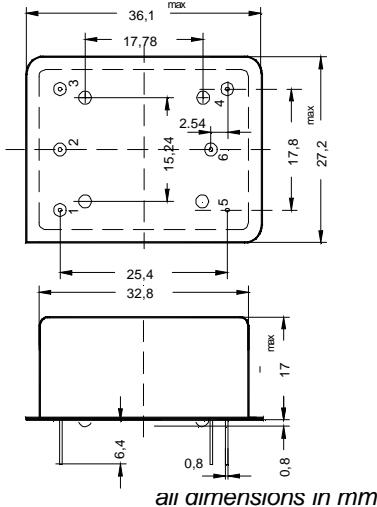

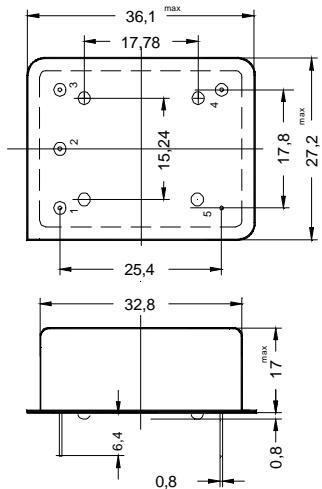

|     | available  | from     | typ.                         | to          |                |
|-----|--|----------|------------------------------|-------------|----------------|
| 1.  | Frequency range  |          | 2                            | 80          | MHz            |
| 2.  | HF- Output   |          | HC-MOS or Sine Wave          |             |                |
| 3.  | Frequency stability in op. Temp. range                                     | $<= \pm$ | 0,2                          | 0,5         | 1 ppb          |
| 3.1 | Frequency overall tolerances <sup>1)</sup>                                 | $<= \pm$ | 0,05                         | 0,2         | ppm            |
| 3.2 | Aging <sup>2)</sup>  | $<= \pm$ | 0,2                          | 0,5         | $*10^{-9}$ day |

| 7.  | Supply voltage   |          | 5                            | 12          | V $\pm 5\%$    |
| 8.1 | Power consumption <sup>4)</sup>  | $\leq$   | 500                          |             | mW @ 25°C      |
|     |  | $\leq$   | 600                          |             | mW @ 0°C       |
| 8.2 | Power consumption during warm-up   | $\leq$   | 1500                         | 2500        | mW             |
| 8.3 | Stabilization time to be<br>within 0.1ppm of final frequency <sup>5)</sup> | $\leq$   | 40                           | 300         | s @ 25°C       |
| 9.  | Enclosure  |          | 27 x 36 x 18 mm <sup>3</sup> |             |                |
| 10. | Weight   | $\leq$   | 25 g                         |             |                |

Contact factory for improved stabilities or additional product options

## Notes:

- <sup>1)</sup> Including adj. tol., tol. vs temperature range, vs supply voltage change, vs. load change and 15 years aging
- <sup>2)</sup> depends on specification; after 15 days continuous operation
- <sup>3)</sup> Phase Noise degrades with increasing output frequency
- <sup>4)</sup> depends on operating temperature range and actual temperature
- <sup>5)</sup> depends on operating temperature range, temperature and warm-up-powerconsumption

### Drawing:

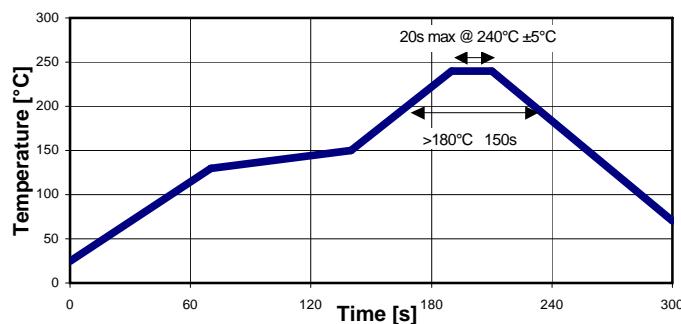

**Oven monitor (6-Pin):**  
low = alarm  
high = ready

### Pin connection:

| Pin | Version 5 Pin | Version 6 Pin |
|-----|---------------|---------------|
| 1   | Frequ. Adj.   | Frequ. Adj.   |
| 2   | Vref.         | Vref.         |
| 3   | Vcc           | Vcc           |
| 4   | RF out        | RF out        |
| 5   | Case / GND    | Case / GND    |
| 6   |               | Oven monitor  |

### Recommended Soldering Profile:

### Marking:

Manufacturer name, Article/Series code, Center Frequency, date code and series no.

These Profile is adjusted to the requirements of higher temperatures at unleaded soldering.

### Environmental conditions:

The ovenized crystal oscillators are approved in the following environmental conditions:

| Test             | IEC 60068 - | MILSTD-           | Test conditions                              |
|------------------|-------------|-------------------|--|
| Sealing test     | 2-17        | 883E - Meth. 1014 | Fine leak: A1 2 x 10-8                       |
| Shock            | 2-27        | 202F - Meth. 213B | A: 50g; 11ms;half-sine                       |
| Vibration, sinus | 2-6         | 202F - Meth. 204D | B: 10..55Hz 0,75mm;55..2kHz 10g; 30 min/axis |
| Thermal Shock    | 2-14        | 883E - Meth. 1014 | A: 100°C to 0°C, water,15 cycles             |

Endurance tests- aging- extended aging 20 days @ 55°C (100%) >1000 days @ 55°C (approval samples)

The oscillator hybrid microcircuit design and construction is in accordance with applicable design and construction requirements.

The final test procedure includes all points of electrical specification especially a 100% test of

- frequency adjustment – calibration
- frequency stability vs. operating temperature range
- long-term stability measurement
- short-term stability measurement
- output waveform
